

# NopCommerce Website – Test Plan

## Test Plan – NopCommerce Website

### 1. Introduction

This document outlines the manual testing plan for the NopCommerce Demo website, conducted by a university student team as part of their graduation project. The website is a full-featured e-commerce platform including modules for registration, gift cards, shopping cart, payments, and more.

### 2. Objectives

- Ensure that all core features of the website work as intended.
- Identify functional and UI issues during manual testing.
- Validate consistent user experience across browsers and devices.
- Establish a basis for future automation testing.

### 3. Scope of Testing

#### ■ In Scope:

- Registration and Login • Gift Card module • Product browsing, search, and filters • Shopping cart and checkout process • UI validation and responsiveness • Wishlist and Compare features

#### ■ Out of Scope:

- Performance or load testing • Security testing • Backend and database validation • Automation (planned to start after manual phase)

### 4. Team Roles and Responsibilities

### 5. Test Types

- Functional Testing - UI/UX Testing - Compatibility Testing (Chrome / Edge) - Regression Testing

### 6. Test Environment

### 7. Test Schedule

### 8. Test Deliverables

- Test Plan document - Test Cases in Excel format - Bug Reports from Jira - Test Summary Report

### 9. Exit Criteria

- All high-priority test cases executed - No open critical bugs in Jira - All planned features validated - Supervisor approval received
